

Teacher Professional Development NGSS Workshops

The Next Generation Science Standards (NGSS) will transform K-12 science teaching over the next few years. Prepare for this exciting shift with a day of professional development at the California Academy of Sciences. On a limited basis, we offer private beginners-level NGSS workshops for groups of teachers from a school or district.

WHAT: Dive into the Framework for K-12 Education to discover the principles underlying the NGSS. Gain experience with the scientific practices, cross-cutting concepts, and disciplinary core ideas that comprise the new standards, and learn how to read those NGSS tables! Participate in hands-on activities, thoughtful discussions, and reflective planning. This beginner's-level overview will give you the tools and confidence to start preparing for NGSS implementation.

WHEN: This is a full day (6 hour) professional development program. Dates are negotiable. Our capacity is limited, so availability is not guaranteed.

WHERE: The California Academy of Sciences, located in Golden Gate Park in San Francisco.

LOGISTICS: We can accommodate a maximum of 36 participants per program. There is a flat fee of \$900 for the six hour program, payable in advance. Coffee, tea, and breakfast snacks are provided; you are responsible for providing your own lunch.
