Pollination and Human Nutrition

Reflection Worksheet

1. An 'ecosystem service' is a benefit that an organism or ecosystem provides to people. Is pollination an ecosystem service? Use the information from Figures 1a, 1b, 2, and 3 to support your answer.

2. Berries are generally good sources of vitamin C, folate, and potassium. How do you think a decline in the number of berry pollinators might impact public health? Use the information from Figures 1a, 1b, 2, and 3 to support your answer.

3. One possible solution to a decrease in the number of animal pollinators in a particular region is to change the types of crops grown in that region from those that are dependent on animal pollinators to those that are not. What do you think of this solution and its potential impact on public health around the world?
